

PHASE 4 summary of churn insights :

- We have 7,043 customers, but sadly 5,174 of them left, so keeping customers is a big challenge.
- Month-to-month customers stick around a bit longer (66 months) than those on one-year (65) or two-year (60) contracts.
- If you're on a month-to-month plan, there's a 43% chance you might leave soon.
- People paying automatically with bank transfer or credit card stay the longest (43 months on average).
- Paying by electronic or mailed check tends to mean leaving sooner (25 and 21 months).
- Most customers still use electronic check (2,365) or mailed check (1,612), even though they don't stick around as long.
- Focusing on automatic payments and month-to-month customers could really help reduce churn and keep more people happy.
